

ENGINEER MUMTAZ ALI

MA

Software Engineer | Full Stack Web Developer | WordPress & WooCommerce Developer

Remote - Available worldwide | Contact through the portfolio website | Page 1 of 2

PROFESSIONAL SUMMARY

Cross-functional web engineer with capability across full stack development, frontend systems, WordPress, WooCommerce, Elementor, responsive design, APIs, databases, performance optimization, technical SEO, and production troubleshooting. Focused on clean architecture, credible interfaces, accessible interaction, and reliable delivery.

EXPERIENCE

Software Engineer & Full Stack Web Developer

Independent / Project-based

Designing and delivering responsive web products, WordPress systems, WooCommerce workflows, frontend applications, APIs, optimization, and technical problem solving.

WordPress, Elementor & WooCommerce Developer

Client and agency projects

Building custom layouts, reusable design systems, commerce interactions, plugin integrations, responsive fixes, performance improvements, and production maintenance.

Frontend & Backend Development

Professional projects and continuous learning

Creating component-based interfaces, backend services, data integrations, validation, version-controlled workflows, and modern deployment foundations.

EDUCATION & PROFESSIONAL DEVELOPMENT

Continuous professional development across software engineering, web development, WordPress, responsive design, databases, AI automation foundations, performance, accessibility, and technical SEO. Learning is reinforced through implementation, documentation, code review, testing, and production problem solving.

PROFESSIONAL PHILOSOPHY

The best implementation is the one that solves the right problem, protects the user experience, supports future changes, and can be understood by the people responsible for it.

This resume uses representative role descriptions. Add verified employers, dates, education records, project links, and contact details before public distribution.
